VR Systems	3 Oculus Rift Systems available	\$35/ per day

Student Opportunities

Background

During our tournament season we host in person events. These events include an in person Esports Show where students interested can get involved in the following areas:

Shout-casting, Camera Operating, Stage Management, Producing, Streaming & Event Management

Our in person events rely on grants and sponsorships. If we receive enough funds to support a show we will call for student support.

Previous Schools we've partnered with:

Tech Voc, MET School of Canada, Canadian Mennonite University, University of British Columbia, BC Institute of Technology, University of Manitoba, University of Winnipeg

Goals

We strive to give any student interested in Esports Production hands on experience with our team of Professionals assisting along the way. **Students will have the chance to work with Industry professionals in Production, Streaming & Event Management.**

Objectives

- Partner with Programs aligned in **Production, Technology & Event Management**
- Support students by pairing them up with Industry Professionals to get **hands on work experience**
- **Provide referrals** to students to assist with future employment
